EXPERIENCE

Albright Labs

April 2023 - present

Web Developer

remote

- Utilized OctoberCMS to develop tailored, responsive websites to meet diverse client needs, while maintaining high coding standards.
- Proficient in Bootstrap, using its robust front-end framework to design user-friendly layouts and components.
- Capable of translating complex client requirements into operational digital solutions, focusing on delivering optimal user experience.
- Delivering OctoberCMS projects within the set timelines, balancing quality with efficiency.

United States Marine Corps - Reserve

May 2016 – May 2022

Infantry Rifleman

Plainville, CT

- Displayed critical thinking, teamwork, and physical endurance during various military operations and training events, including hikes, combat endurance courses, and live-fire ranges
- Assisted in the training and mentorship of junior Marines, helping them to develop the skills and confidence needed to operate effectively as infantrymen
- Trained in various infantry tactics, techniques, and procedures, including fireteam and squad operations, patrolling, and urban combat
- Participated in multiple field training exercises, rehearsing infantry operations in various environments and conditions

PROJECTS

Arch Studio: Multi-page site

- A multi-page React application for a fiction architecture firm
- front-end styling created with a mobile first approach using tailwind CSS
- Focus on creating clean and responsive styling

Connect Four

- Play Connect Four against another player in the browser
- Game will automatically detect wins and keep score
- Save this React app as a Progressive Web Application

Tastemakr

- Implemented multiple REST API's to generate accurate music recommendations based on user input
- Integrated a noSQL database with MongoDB and GraphQL to allow users to save favorite recommendations
- MERN stack applications with JWT authentication
